

Through a unique patented design MJP DRB offers a very high performing jet combined with excellent performance and strength confirmed by a unique 5-year warranty.

MJP DRB Waterjets

Features & Benefits

- Double Reverse Bucket – inboard hydraulics
- Duplex stainless steel jet with superior wear strength
- Thrust is taken in jet unit in an oil lubricated hub unit accessible from aft available from MJP 550 and up
- Optionally complete intake of GRP for the best performance, corrosion protection and service life
- Mixed flow jet with minimum blade clearance for the best available jet performance
- For hydraulic and electronic control system options, see MJP Designers guide
- Lowest noise and vibration with floating drive shaft design

Description

The MJP DRB jet with a Double Reverse Bucket offers an inboard hydraulic design with superior performance and unmatched service life in for instance Commercial Crafts, Coast Guards, Navy Applications and Yachts.

Adapted scope of supply

MJP can offer a package adapted to the vessel and the needs of the customer. MJP customize jet selection, jet installation, shafting, intermediate shaft options, hydraulic and electronic control systems. For more information see MJP Designers Guide and contact a MJP sales office for our jet suggestions.

A force to trust
